

INSTITUTE OF GERONTOLOGY

Brain Imaging Research Study

See Your Brain At Work!

We are conducting a research study to determine which parts of the brain are used to find your way through the environment and remember where you are going. Eligible participants will perform pencil and paper and computerized tests of learning and memory. Some participants may be eligible to receive magnetic resonance imaging (MRI) scans of the brain so that we can look at your brain function.

We are looking for men and women who are:

1. In generally good physical health
2. 50 years of age and older

You will be reimbursed for your participation.

If you are interested in learning more about our study, please contact us at **313-871-0705** and ask about the Brain Imaging Research Study.

SPATIAL NAVIGATION RESEARCH STUDY

We are conducting a research study to determine how people find their way through the environment. Eligible participants will perform a computerized "virtual reality" spatial learning task along with other cognitive tasks.

We are looking for volunteers who are:

1. In generally good physical health
2. At least 55 years of age
3. Right-handed

You will be compensated \$10 per hour for your participation in a 2-3 hour study.

If you are interested in participating, please email us at spatialnavi@yahoo.com or call us **313-871-0705**

To volunteer for other non-research opportunities contact:
Donna MacDonald at 313-577-2297 or email: ba8841@wayne.edu
